

Cairo on Tuesday, February 06<sup>th</sup>, 2018

Press Release:

**«Dubai Electricity and Water Authority» (DEWA) awards the Consortium of «ELSEWEDY ELECTRIC» and «SIEMENS AG» an EPC Contract for AWEER “H” station phase IV Power Plant in Dubai, United Arab Emirates**

ELSEWEDY ELECTRIC (EGX: SWDY.CA), the leading Integrated Energy Solution Provider in the Middle East and Africa, as leader to a Consortium which includes SIEMENS AKTIENGESELLSCHAFT (Germany) announces receiving DEWA’s award for the EPC contract of the Al AWEER “H” station phase IV Power Plant in Dubai, United Arab Emirates, with a volume of approx. 300 million USD.

The 800 megawatt gas-fired open cycle power project is located in Al Aweer in the Emirate of Dubai and shall start producing energy by 2020. The power plant will consist of three Siemens F-class gas turbines with generators adding to the Siemens F-class gas turbine fleet already widely utilized in DEWA’s projects.

ELSEWEDY ELECTRIC’s scope of work includes engineering, procurement and installation of balance of plant in addition to the erection and installation of the SIEMENS gas turbines. In addition, ELSEWEDY ELECTRIC will be responsible for the site preparation, levelling and the civil, construction and site utilities for the project

Siemens scope of works includes fabrication, supply, testing and commissioning of the gas turbine generators in addition to joint project management.

This Project meets the continued growth of demand for electricity in the Emirate of Dubai and works to establish the status of Dubai as a leading model in the region for its effective and efficient electricity and water infrastructure.

DEWA is working hard to significantly advance the quality of life in Dubai and is one of the most important contributors to the vision of the wise leadership of Dubai and the UAE. DEWA is also upgrading its services to be as efficient and reliable as possible with its electricity and water services to achieve sustainable development in Dubai, and happiness for generations to come.

ELSEWEDY as EPC main contractor in power generation, independently and in consortiums, has over the last 3 years successfully connected more than 5,000 megawatts of conventional and renewable energies to the energy infrastructures of EGYPT Middle East & Africa. ELSEWEDY ELECTRIC also targets to add another 1,200 megawatts from Beni Suef power project in EGYPT, which is under construction in a Consortium with Siemens AG as well.
