

Orascom Construction Announces the Start of Production at Natgasoline in Texas

Orascom Construction Limited (NASDAQ Dubai: OC; EGX: ORAS) announces the start of commercial production at Natgasoline, the largest methanol production facility in the United States. This milestone follows the achievement of mechanical completion in April 2018.

Located in Beaumont, Texas, the production facility will have a capacity of up to 1.8 million metric tons per annum.

Orascom has built extensively on its global industrial track record, which encompasses several sectors including petrochemicals, fertilizers and cement projects across 11 countries around the world. With the completion of Natgasoline, the Group has now constructed as the EPC contractor the largest methanol production facility in the U.S. as well as the first world-scale fertilizer complex to be built in the U.S. in the past 25 years. These strengthened technical and commercial capabilities position the Group well for further industrial projects across its main markets.

About Orascom Construction Limited

Orascom Construction Limited is a leading global engineering and construction contractor primarily focused on infrastructure, industrial and high-end commercial projects in the Middle East, North Africa, the United States, and the Pacific Rim. OC has consistently ranked among the world's top contractors and is ranked number 32 on ENR's 2017 Top 250 International Contractors list. The Group also develops and invests in infrastructure opportunities, owns 50% of BESIX Group, and holds a construction materials and property management portfolio.
