

In Line with Egypt Vision 2030 Towards Digital Transformation

AOI Cooperates with Orange Egypt in Digital Transformation, Distance education, And E-Services

lieutenant General Abdel Moneim El-Terras, Chairman of the Arab Organization for Industrialization, Eng. Yasser Shaker, CEO and Managing Director of Orange Egypt, and several company leaders witnessed the signing of a cooperation protocol in digital transformation, distance education, and smart electronic services.

The signing of this protocol comes within the framework of the Egyptian directives to enhance constructive cooperation and exploit national manufacturing capabilities to implement Egypt's Vision for Sustainable Development 2030.

The cooperation aspects include the automation and digital transformation of all ministries, governorates, educational institutions, hospitals, and others in all sectors, as well as transportation projects and smart roads. Furthermore, the protocol entails establishing and equipping data centers and various communication networks “Wi-Fi and Fiber”, and distance education applications and programs (E-learning - LMS - Tablets).

In this regard, Lieutenant General Abdel Moneim Al-Terras praised Orange Egypt's expertise in the fields of communications, information technology, digital transformation, and high-quality electronic expertise. In addition, Orange Egypt has unique qualified technical cadres and the latest advanced technologies.

Al-Terras demonstrated that Arab Organization for Industrialization is studying the implementation of many projects in Egypt, and African and Arab countries in the fields of digital transformation, Information and Communications Technology, and e-learning. He also highlighted that this cooperation will provide many job opportunities for young engineers and technicians, training and acquiring modern skills and experiences in accordance with the Fourth Industrial Revolution.

For his part, Eng. Yasser Shaker praised the close and constructive cooperation with the Arab Organization for Industrialization, which is an Egyptian, Arab and international organization. It is also the industrial backbone for the localization of technology and digital transformation. He also praised the role of Arab

Industrialization and its expertise in implementing various industrial and economic development projects in accordance with the standards of the Fourth Industrial Revolution.

Shaker said that Orange Egypt is proud of being the main operator and partner of the Arab Organization for Industrialization. This joint work will contribute to the localization of the latest modern technologies in digital transformation applications, E-education, communication, and information systems under international quality standards due to Orange's expertise and local and international cadres, qualifying them to provide, manage and operate all services with high quality and efficiency.
