3Q21 in a nutshell:

- 3Q21 was marked by an expedited vaccination programme in Egypt and further relaxation of travel measures, including the resumption of Russian flights, and the removal of Egypt from the UK's 'red list'. NIR remained on the rise, reaching USD40.8bn in September, mainly on the USD3bn Eurobond issuance. Foreign holdings of local debt stood at USD30bn, as of August vs. a previous peak of USD28.5bn in February, supporting the overall BoP dynamics. Remittances from Egyptians living abroad hit a historic high, up 13.2% y-o-y to USD31.4bn in FY20/21. The CBE maintained rates in 3Q21, as headline inflation remained below the lower bound of the CBE's inflation of 7%+/-, despite accelerating to 6.6% in September from 5.68% in August. On the carry trade front, Egypt continues to stand out among EM, with a favourable risk-return profile, on an attractive carry trade with high real yields (c6.5% pre-tax) with the five-year CDS at 450bps. The PMI contracted to 48.9 in September from 49.8 in August, marking a four-month low, as a result of weaker consumer demand. The EGP remained steady against the USD, coming in at an average of c15.71x in 3Q21.
- CI Capital Holding for Financial Investments'** net profit after tax & minority interest stood at EGP241mn, up 122% y-o-y, marking the highest quarterly results achieved in the history of CI Capital. The solid performance was bolstered by the IB platform and micro-finance ongoing uptrend, as the latter continue to capitalise on growing footprint.
- Total on-balance sheet financing portfolio** inched down 3% y-o-y to EGP12.1bn, as of 3Q21, with blended NIM of 8.0%. Solid portfolio growth across all financing businesses was overshadowed by the decline in leasing portfolio. The **NBFS platform** represented 60% and 31% of the Group's revenue and bottom line during the quarter, respectively.
- Corplease** closed the quarter with an on-balance sheet portfolio of EGP9.8bn, down 10% y-o-y. The Group's leasing subsidiary secured new lease bookings worth EGP3.7bn in 9M21, in line with the previous year's comparable period.

CI Capital's consolidated revenues grew 36% y-o-y to EGP773mn in 3Q21, primarily driven by the IB platform's solid performance and micro-finance ongoing uptrend.

The total on-balance sheet financing businesses portfolio detailed EGP12.1bn, as of 3Q21, displaying a 3% y-o-y decline, down from EGP12.5n in 3Q20. The Group's different financing business lines, with the expectation of the leasing business, witnessed solid portfolio growth driven by improved business activity.

Net interest income for the quarter rose 14% y-o-y to EGP223mn, fueled by Reefy's strong performance, as well as mortgage finance ongoing ramp-up of operations. The leasing business slightly lagged, on intensifying competition within the segment and the impact of Corplease's EGP2.7bn securitisation bond issuance in 4Q20, which naturally improved the liquidity position, yet led to a lower interest income. The blended net interest margin stood at 8.0% in 3Q21, up 48bps vs. 3Q20.

Operating expenses for the quarter grew 28% y-o-y to EGP476mn, primarily on higher people cost related to growing greenfield subsidiaries and Reefy's expansion. Meanwhile, operating profit was seen at EGP297mn in 3Q21 vs. EGP194mn in 3Q20.

Reported net profit after tax and minority interest was at EGP241mn in 3Q21, up a significant 122% growth over the comparable quarter of the previous year, marking the highest quarterly results achieved in the history of CI Capital. The solid performance was bolstered by the IB Advisory business, capital gains at the merchant banking level, and micro-finance ongoing uptrend, as it continued to capitalise on its growing footprint.

Financial performance:

Corplease, the Group's leasing arm, recorded revenues of EGP302mn in 3Q21, down 20% y-o-y, driven by lower interest income, on decline in policy rates and intensified competition in the leasing market, which took its toll on new bookings' spread. Revenues were also impaired by the recognition of EGP22mn in loss from revaluation of securitisation portfolio vs. a gain of EGP25mn in the comparable period.

In 4Q20, Corplease concluded the largest securitisation transaction in its history, amounting to EGP2.7bn. This significantly improved its liquidity position but, entailed a drop in future interest income that is related to the securitised part of the leasing portfolio.

The company generated net interest income of EGP76mn in 3Q21, down 22% y-o-y, implying an annualised NIM of 3.3%.

Operating profit declined 47% to EGP70mn in 3Q21, while net operating margin contracted to 23.3% from 35.2% in 3Q20. Total operating expenses for the quarter shed 6% y-o-y to EGP232mn, as lower leverage and interest rate environment offset the y-o-y growth in people cost and other SG&A.

Expected credit loss resulted in a net reversal of EGP2mn in 3Q21. Reported net profit after tax was at EGP57mn, displaying a 31% y-o-y decline.

Operational performance:

Corplease's on-balance sheet leasing portfolio declined by 10% y-o-y to EGP9.8bn in 9M21 from EGP10.9bn in 9M20. New bookings for the nine-month period were flat y-o-y, standing at EGP3.7bn, while the quarter recorded EGP1.2bn in new bookings vs. EGP2bn in 3Q20.
