

**As part of a global alliance,**

**The Ministry of Housing, Utilities and Urban Communities signs a Memorandum of Understanding with Alameda Healthcare Group to operate and manage the first and largest hospital in the New Administrative Capital**

The global alliance includes Alameda Healthcare Group, China State Construction Engineering Corporation “C.S.C.E.C” and Al-Hazeq Construction Company, in addition to, a leading group of global experts in engineering and architectural consultancy specialized in the medical field

**December 12, 2021 – Cairo, Egypt** – In line Egypt vision 2030, which reflects the state’s long-term strategic plan to create sustainable societies in partnership with leading economic, technical and scientific entities and development partners. Today, the Ministry of Housing, Utilities and Urban Communities signed a Memorandum of Understanding with a global alliance that includes Alameda Healthcare Group, the China State Construction Engineering Corporation “C.S.C.E.C” and Al-Hazeq Construction Company, to establish, manage and operate the first and largest hospital in the New Administrative Capital.

According to this public–private partnership, Alameda will operate a new hospital for **49** renewable years, while the facility will be owned by the ministry, represented by NUCA and constructed by the China State Construction Engineering Corporation “C.S.C.E.C” and Al-Hazeq Construction Company.

The alliance responsible for the establishment, construction and management of the hospital will collaborate with global consultants in the field of engineering and architectural consultancy specialized in the medical field, such as the global office “HKS”. In addition to, a global partner to contribute in setting international medical standards and management.

Moreover, the ministry will provide a land plot of **7** feddan located near the CBD New Capital Towers in the New Administrative Capital's Business District. Alameda will begin running the facility upon the completion of the hospital’s construction phase after **36 months** from the agreement signing date. Alameda will invest **1 billion Egyptian pounds** for equipping the hospital with the cutting edge and most advanced medical technology and equipment.

In July 2021, the Ministry of Housing Utilities and Urban Communities welcomed Alameda’s proposal to establish a top-notch facility in partnership with NUCA. Today, this MOU reflects the ministry’s robust efforts to provide the new administrative capital with all integrated services according to international standards.

The facility will add to Alameda’s network **300** beds, which will include **100** ICU beds and **200** single rooms, **10** operating theaters, robotics surgery, **2** Cath labs, **2** linear accelerator machines, comprehensive oncology program. Moreover, the group will direct robust investments towards establishing world-class “Centers of Excellences” to provide integrated medical services in different specialties including; Cardiac Sciences, Neurosciences, Renal Sciences, GIT & Liver Diseases, Respiratory Diseases, Orthopaedics & Spine and Organ Transplantation.

Alameda shall collaborate with an International Healthcare Chain from US or Europe to bring world-class clinical pathways, techniques and clinical bandwidth along with brand positioning. This hospital shall also have a training centre to enhance the skills of young physicians and nurses.

“We are honored to sign today’s MoU with the Ministry of Housing, Utilities and Urban Communities and to be its partner of choice, in supporting the country through establishing a first of its kind world class quaternary care international hospital. Carrying on with our mission to expand our footprint within the country and deliver excellent healthcare to our people, we are delighted to be in the New Administrative Capital. With our collaboration with top international hospital chain, we shall build the clinical bandwidth to ensure all complex procedures with latest techniques can be done within the country.” **said Dr. Fahad Khater, Chairman and Owner of Alameda Healthcare.**

In this context, **Neeraj Mishra, CEO of Alameda Healthcare Group** said, “This is a major milestone in our journey to expand our capacity and geographical presence. Our endeavor is to position this hospital on the world map as the referral and training centre for the country and continent”

Moreover, in alignment with the continuous pandemic waves and its new emerging variants, the hospital will have an isolation unit to assist the country in combating pandemic waves.

With a solid track record spanning more than three decades of expertise in the medical sector and a patient-centric approach, Alameda Healthcare is well-positioned to double its capacity by building new green field hospitals in the country. On the other hand, the China State Construction Engineering Corporation “C.S.C.E.C” is a global contracting giant, occupies a distinguished position among the largest international corporations in the field of contracting in the world. While, Al-Hazeq Construction is an Egyptian company with extensive local experiences in the field of tourism and commercial projects.

This MoU comes as an extension of the state's plans to establish the new administrative capital of Egypt and provide all major services at the highest global standards. The most essential of these services is the provision of exceptional healthcare services, which will aid in positioning Egypt at the forefront of the healthcare field in the MEA region.
