Siemens Energy appoints Layla El Hares Managing Director of Egypt

- Brings over 20 years of energy experience to the role
- An excellent addition to the Middle East management team

Siemens Energy, a world leading energy technology company, announces the appointment of Layla El Hares as the Managing Director of Egypt, effective February 1, 2022.

An Egyptian and French national, El Hares will be based in Cairo and is responsible for supporting Siemens Energy's activities in Egypt, as well as developing opportunities to meet the challenges of the energy transition.

As a senior executive with over 21 years of international experience across the energy sector, particularly in the oil and gas industry, El Hares brings significant expertise to the role.

"Siemens Energy and Egypt have a long and successful legacy of developing, expanding and decarbonizing the country's energy sector. Layla is an excellent addition to the Siemens Energy team will be instrumental as we navigate the energy transition in partnership with Egypt to achieve its sustainable development vision," said Dietmar Siersdorfer, Managing Director Middle East at Siemens Energy.

"I am excited to join Siemens Energy as the Managing Director for Egypt. I look forward to leading the company's business in the country and am thrilled about the innovation and growth opportunities for supporting the country in decarbonizing the energy sector," said Layla El Hares.

El Hares joins Siemens Energy after her role as General Manager, Development East Mediterranean and Asset Manager Egypt for Royal Dutch Shell, a role she assumed in 2017 following the company's acquisition of BG Group. Prior to Shell, El Hares held several senior roles in BG Group in Egypt, Europe and globally.

Siemens Energy is one of the world's leading energy technology companies. The company works with its customers and partners on energy systems for the future, thus supporting the transition to a more sustainable world. With its portfolio of products, solutions and services, Siemens Energy covers almost the entire energy value chain – from power generation and transmission to storage. The portfolio includes conventional and renewable energy technology, such as gas and steam turbines, hybrid power plants operated with hydrogen, and power generators and transformers. More than 50 percent of the portfolio has already been decarbonized. A majority stake in the listed company Siemens Gamesa Renewable Energy (SGRE) makes Siemens Energy a global market leader for renewable energies. An estimated one-sixth of the electricity generated worldwide is based on technologies from Siemens Energy. Siemens Energy employs around 91,000 people worldwide in more than 90 countries and generated revenue of €28.5 billion in fiscal year 2021. www.siemens-energy.com.
