

PHYSICIAN TO THE PRESIDENT
THE WHITE HOUSE

30 July 2022

MEMORANDUM FOR: KARINE JEAN-PIERRE
ASSISTANT TO THE PRESIDENT AND
WHITE HOUSE PRESS SECRETARY

FROM: KEVIN C. O'CONNOR, D.O., FAAFP
PHYSICIAN TO THE PRESIDENT

SUBJECT: President Biden SARS-CoV-2 Update

As described last week, acknowledging the potential for so-called "rebound" COVID positivity observed in a small percentage of patients treated with PAXLOVID, the President increased his testing cadence, both to protect people around him and to assure early detection of any return of viral replication.

After testing negative on Tuesday evening, Wednesday morning, Thursday morning and Friday morning, the President tested positive late Saturday morning, by antigen testing. This in fact represents "rebound" positivity.

The President has experienced no reemergence of symptoms, and continues to feel quite well. This being the case, there is no reason to reinitiate treatment at this time, but we will obviously continue close observation.

However, given his positive antigen test, he will reinitiate strict isolation procedures. As I've stated previously, the President continues to be very specifically conscientious to protect any of the Executive Residence, White House, Secret Service and other staff whose duties require any (albeit socially distanced) proximity to him.

As promised, I will keep your office updated with any changes in his condition or treatment plan.

Respectfully submitted,

Kevin C. O'Connor, D.O., FAAFP
Physician to the President
The White House

Associate Professor, The George Washington University School of Medicine & Health Sciences
